Product Description

The M2 Asset Tracking Beacon is a compact, low-cost asset-tracking device that allows users to track the location of their assets in real-time. It can be used indoors or outdoors to monitor inventory or other critical use cases for your operation. It is portable and simple to set up. You don't need any specialist equipment to get things up and running. It can be hung, screwed, or sticker-attached to a surface. The M2 Asset Tracking Beacon is an excellent choice for companies and organizations who need to monitor and track their assets in the field.
